

OXYMORONS

WHAT IS AN OXYMORON?

An Oxymoron is defined as a figure of speech that incorporates words that contradict one another.

Origin (Etymology)

Derived from the Greek *oksús mōros*, where-in *oksús* means sharp, keen, pointed and *mōros* means dull, foolish, stupid meaning sharply-dull, keenly-stupid, pointedly foolish

These are self-contradicting words

Some Oxymorons

Living dead meaning people who are dull and boring

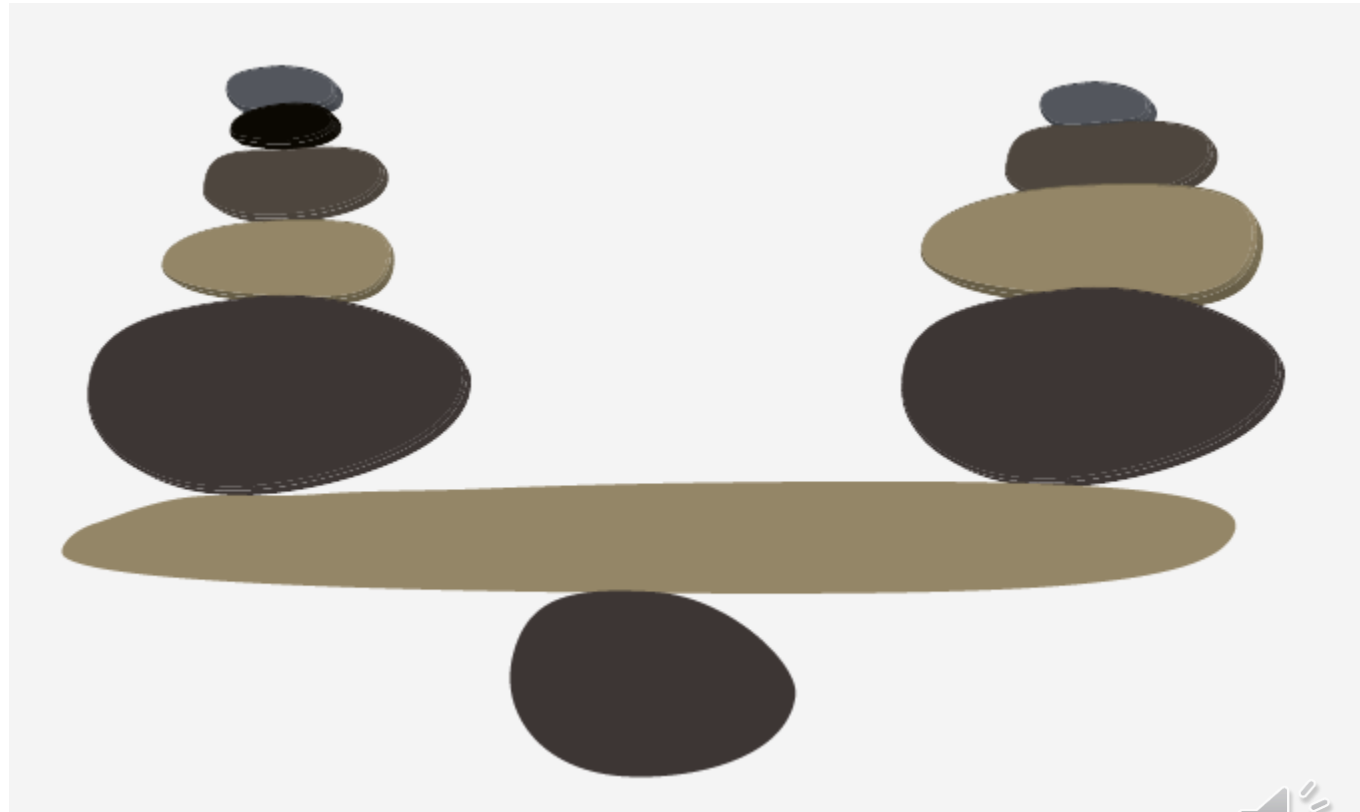

Students graduate and begin working like machines for organizations and helping to spread the *living dead*.

Some Oxymorons

Same difference meaning equal in value, amount, function or meaning. It could also mean comparable or identical

Ali said, "Ram has
scored 99%."
Saad said, "No, its
98.8%"
Ali, "**Same difference!**"

Some Oxymorons

Jumbo shrimp is a slang or informal way of calling an unimportant person

Though Daniel is a **jumbo shrimp** in the party yet he always bigs himself up.

Some Oxymorons

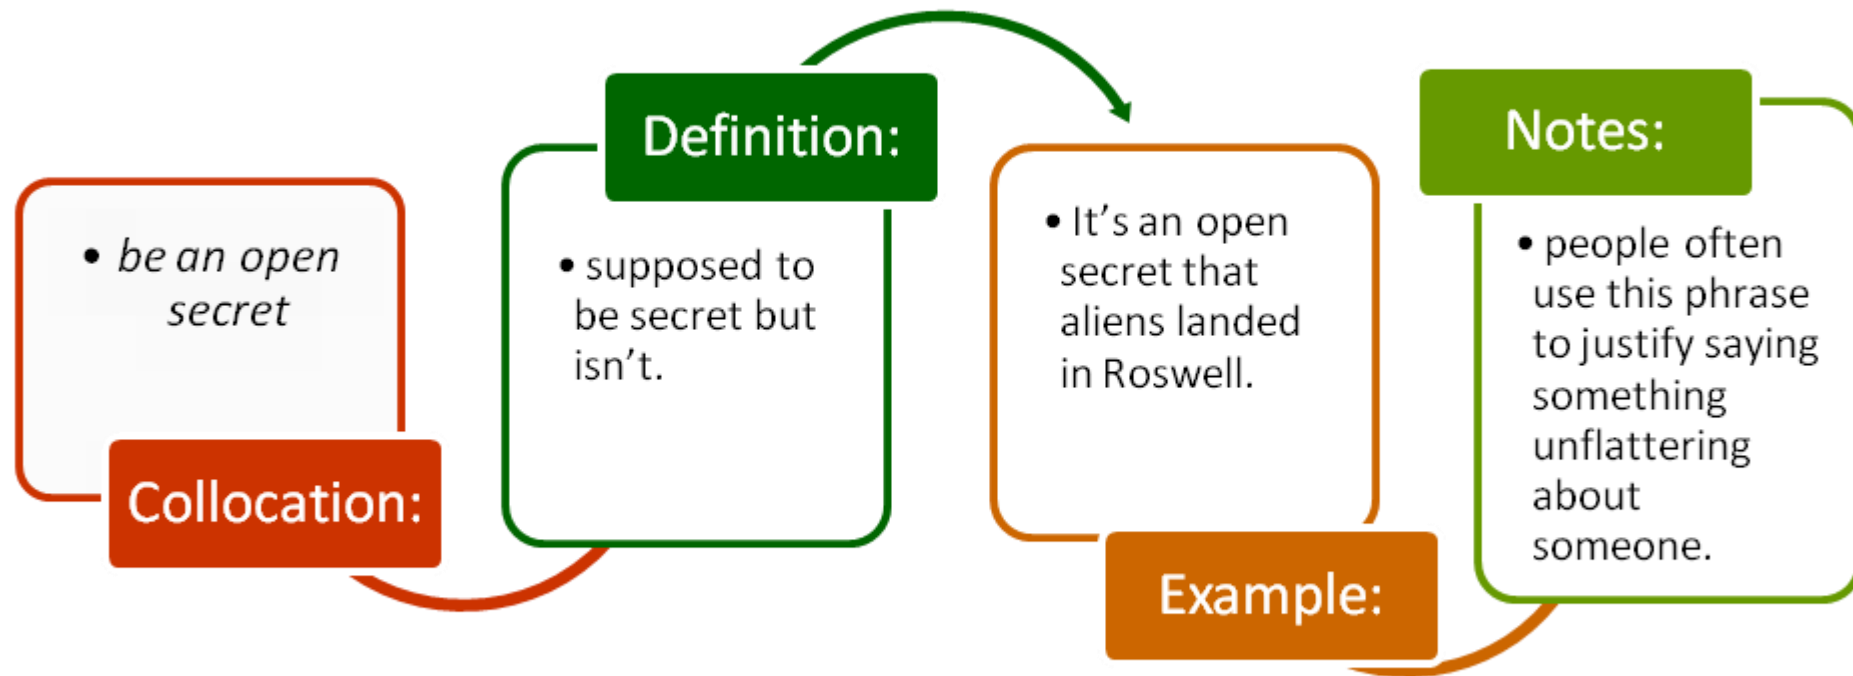

Found missing is a shorted version of found to be missing. It means that something/someone was discovered to be missing.

My pet dog was found missing when I woke up this morning.

Some Oxymorons

Open secret means a supposed secret that is in-fact known to many people.

Some Oxymorons

Organized chaos means a complex situation or process that appears chaotic while having enough order to achieve progress or goals.

The restaurant was very busy, and the kitchens were **organized chaos**.

Thank You!
